

## WUNDA Thermally Dynamic Pert/Al/Pert Pipe - easy to use, no springback!

Our Pert/Al/Pert pipe has been manufactured using the German UNICOR aluminium plastic composite pipe production line, which is one of the most advanced production lines in the world.

Our Pert/Al/Pert pipe is equal in strength to metal pipe, it is also resistant to high temperatures, high pressure and corrosion. The inner wall of the pipe is smooth, so resistance to the flow of water is minimal. Capacity of water flow is superior to metal pipe of the same diameter by 30%.

- 18% higher output than plastic pipe.
- Leak proof pipe.
- 16mm pert/alu/pert pipe.
- Flexible aluminium and polyethelene.
- 200-300 year life expectancy.
- 100 year guarantee.
- very low expansion and contraction, just 5cm in 100 linear metres. (similar to copper). Ordinary plastic pipe normally 50cm in 100 linear metres.
- 100% oxygen tight (oxygen ingress can rot boilers). Ordinary pipe is normally only 80%.
- Easy to shape by hand - easy to fit, stays where it's put with no spring back.
- Detectable under the floor.

**18% higher heat output than ordinary Pex and Polybutylene pipe**
